Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6-12,14-17, 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Hood (US 6,076,193).

Hood discloses a thigh slimming device, pants 10, with a generally U-shaped support member, Crotch 14 as seen in figure 1. The shape enhancing garment, shorts 10 includes a shape-enhancing insert of plastic material 42,46 in the inner thigh region. The crotch insert is U-shaped with plastic supports,arms or frame 42,46 and base, the short fabric 14. The plastic supports are rods or wires as broadly claimed. The frame carries fabric pouch 58 and the pouch 58 includes a liner layer. The means for removable attachment is stitching. The supports in the thighs would inherently manipulate the dimension of at east a portion of the inner thighs in the thickness and pressure of the support inserts 42,46 and perform the method as claimed. (See Hood, figure 1 and col. 3,line 25 – col.4 ,line 56),

Claims 1-4, 6,8,9-11,14,15,17,20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Blair (US 3,392,733).

Blair discloses a thigh sliming garment 10 with a U-shaped support member, crotch 14 as seen in figure 1 and is a shape enhancing insert. The arms are the extension

portions at 30 in figure 1 and the central portion is the base at 14 as seen in figure 1.

The insert is a frame about the stitching 32 and is fabric. The removable attachment includes the stitching which is easily removable by cutting or ripping as broadly claimed.

The elastic structure of portion 14 performs the shape-enhancing function in the thigh as claimed. (See Blair, figure 1, col. 1, line 61- col. 2, line 53).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hood.

Hood discloses the invention substantially as claimed. However, Hood does not specifically disclose the garment as being jeans or that the supports or stays include a coating. It is well known that stays include rubber or silicone coatings in order to provide better gripping ability to the wearer. Accordingly it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the garment of Hood to include a coating on the supports in order to provide better gripping ability to the skin of the wearer in addition to placing the supports in any other known pant garment such as jeans.

Art Unit: 3765

Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited references alone or in combination disclose the removable supports that are attachable by the claimed means as claimed in claims 18 and 19.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
